Tailored Courses

Datamine courses can be also delivered on-site and can be configured using company data based on work processes and business outcomes. Benefits include:

- Better understanding of how to use the software to achieve daily outcomes,
- Greater retention levels as training is job specific,
- Site specific issues will be discussed as site data will prompt questions related to business outcomes, and
- Trainees will have more confidence using the software to meet business outcomes as soon as the course is completed.
