

# 2009 User Conference

DATAMINE

Datamine International (India) is pleased to announce the 6<sup>th</sup> Datamine Users' Meet on the 16<sup>th</sup> and 17<sup>th</sup> of November 2009 at Jodhpur, Rajasthan, India. As you know, Users' Meet is organized as a part of our commitment to our clients; to provide the best possible services and leading edge software solutions together with the sharing of our global experiences. Over these past few years this meet has proved to be a common platform for all of us to share ideas, technologies and concerns. With your help and co-operation, we hope to continue the tradition this year too.

The focus of this meeting will be "**Operational Improvement**" and will look at the different solutions proposed within this framework.

Following the Users' Meet, Datamine will also be organising a workshop for the NPV Scheduler 4 and ISTS. The Workshop will be for 2 days i.e. the 18<sup>th</sup> and 19<sup>th</sup> of November 2009.

We have attached the registration forms for the Users' Meet and the Workshop. Kindly send us the forms duly filled in by you.

We also request you to present (on behalf of your organization) one technical paper as a case study using the solutions from Datamine. The paper should highlight how you are using our solutions and the benefits that you have derived from the use of these solutions vis-à-vis conventional methods. As before, there will be prizes for the three best technical papers.

We look forward to your support and co-operation in making this Meet a success. In particular, we look forward to sharing your thoughts and ideas on the best possible use of the solutions provided by Datamine for improving current mining practices.

Please find attached the registration forms that we kindly request you fill out and return by Post / Fax / Email to the address below, to reach us on or before the **15<sup>th</sup> October, 2009**.

We value our association with you and look forward to a positive response.  
Sincerely,

Event Coordinator  
Datamine Users' Conference 2009
